Daily Reader - Privacy Policy

Daily Reader needs no account, never asks for your name, email or password, and does not track you for advertising. Most of your data stays on your device or in your private iCloud.

1. Data controller

The data controller is Netmade Bartłomiej Jończy, ul. Leśna 3, 34-108 Frydrychowice, Poland, tax ID (NIP) 5512201980. Privacy contact: netmade@netmade.pl. This policy covers the Daily Reader app on iOS, iPadOS and macOS, its widgets and its share extension.

2. Data kept only on your device and in iCloud

Your sources (RSS feeds, YouTube channels, websites), streams, saved articles, folders, reading history and settings are stored locally on your device. Some of them (streams, folders, saved articles, sources) sync through your private iCloud database (CloudKit). Only your Apple account can access it — we cannot see this data. You control syncing in your device's iCloud settings.

Photos you take with the camera as a source image stay on your device. The app asks for camera access only for this purpose.

3. Data processed by our server

Some features run through our server (dc.dailyreaderapp.com). For those we process only the following data:

Data	Purpose	When
Signed App Store subscription proof (contains the `originalTransactionId`)	Creating an anonymous account and confirming an active Daily Reader Plus subscription	While you have an active subscription
Firebase Cloud Messaging token and device language code	Sending push notifications in your language	When you allow notifications
URL and name of a watched source, check interval	Checking the source for new content and notifying you	When you turn on notifications for a source
Article URL and language code	Generating a short AI summary	When you request a summary
YouTube channel URL	Converting it to an RSS feed URL	When you add a YouTube channel
Like, dislike or broken-source report for a catalog source	Ranking and maintaining the source catalog	When you use those buttons
IP address and technical request data	Handling the connection and server security	On every connection to the server

We do not link this data to your name, email or Apple ID — we have no access to them.

4. Third-party services

- **Apple** (App Store, StoreKit, iCloud, APNs) — payments and subscriptions, sync, notification delivery. Apple alone handles payments; we never see card details. Apple's policy: apple.com/legal/privacy.
- **Google Firebase Cloud Messaging** — push notification delivery. Firebase Analytics and ads are disabled in the app. Policy: firebase.google.com/support/privacy.
- **Google Gemini API** — our server sends it the content of the article you want summarized. We send no data that identifies you.
- **Content publishers** — the app loads feeds, articles, images and videos (e.g. YouTube via youtube-nocookie.com, Reddit, Bluesky) directly from their servers. Publishers then see your IP address and browser data under their own policies.

5. Legal bases (GDPR)

- Performance of a contract (Art. 6(1)(b)) — the subscription, notifications, summaries and other features you request.
- Consent (Art. 6(1)(a)) — push notifications and camera access; you can withdraw it in system settings.
- Legitimate interest (Art. 6(1)(f)) — server security and maintaining the source catalog.

6. Retention

We keep account and device data while your subscription is active and for 30 days after it expires. Watched sources are deleted when you turn off their notifications. Article URLs sent for summaries are kept no longer than needed to generate the summary [to confirm]. You delete local and iCloud data yourself by removing the app or your iCloud data.

7. Transfers outside the EEA

Apple and Google may process data outside the European Economic Area, including in the US, under Standard Contractual Clauses or the EU-US Data Privacy Framework. Our server is located in Poland, in an OVHcloud data center, which processes data on our behalf as a processor.

8. Your rights

You have the right to access, rectify, erase, restrict, port and object to the processing of your data, and to withdraw consent at any time. Email netmade@netmade.pl. Since we do not know who you are, we may ask for your App Store transaction ID to find your account. You may also lodge a complaint with a supervisory authority — in Poland, the President of the Personal Data Protection Office (uodo.gov.pl).

9. Children

The app is not directed at children under 13 and does not knowingly collect their data.

10. Changes

We will announce material changes in the app or at dailyreaderapp.com. The date at the top of this document shows the last update.
